ABDULWAHAB TESLIM

AI QUALITY ENGINEER | LLM EVALUATION SPECIALIST | FRONTEND ENGINEER | QA AUTOMATION

Nigeria (Remote) | Email: alajagusiteslim@gmail.com

LinkedIn: https://linkedin.com/in/teslim-alajagusi-3ab347438 | GitHub: https://github.com/Alajagusi12

Portfolio: https://teslim-portfolio-dgxh.vercel.app

PROFESSIONAL SUMMARY

AI Quality and LLM Evaluation Specialist with 5 years of experience across TELUS International, Turing, RWS, and Micro1. Consistently rated in the top agreement band against reference solves, with full marks across safety and harm categories. Skilled in factual verification, hallucination detection, adversarial edge-case testing, and writing evidence-based evaluation rationales. Also a QA Automation Engineer (Playwright, TypeScript) and frontend developer who built EvalOps, a live AI benchmarking platform. Bilingual in English and Yoruba, able to evaluate AI-generated content in both languages for accuracy, fluency, and cultural appropriateness.

PROFESSIONAL EXPERIENCE

INDEPENDENT AI EVALUATOR & QA ENGINEER | Self-Employed (Freelance, Part-time) | January 2021 – Present

- **AI Evaluation:** Conducted independent contract work for various AI training platforms, evaluating model outputs for factual accuracy, reasoning, and safety compliance.
- **Quality Assurance:** Performed manual and automated testing for independent web development clients, writing test cases and documenting reproducible defects.
- **Continuous Development:** Built and deployed full-stack web applications (EvalOps, Nexus) to continuously practice and demonstrate modern engineering and QA skills.

AI TRAINER & FRONTEND QA REVIEWER | Micro1 (Freelance, Remote, Part-time) | October 2026 – Present

- **Model Behavior Analysis:** Systematically evaluate complex AI outputs across diverse task types, assessing reasoning accuracy, logical consistency, and adherence to task instructions.
- **Adversarial Prompt Engineering:** Refine prompts and task designs, building complex scenarios intended to expose hidden model failure modes and test behavioral boundaries.
- **Frontend Code Evaluation:** Evaluate React and TypeScript codebases for technical quality, identifying rendering issues, assessing state management, and validating components against production standards.

AI EVALUATION CONTRIBUTOR | Turing (Contract, Part-time) | January 2025 – Present

- **Systematic Assessment:** Evaluated 500+ prompts and responses across diverse tasks and domains, assessing reasoning quality, factual correctness, and multi-turn consistency, while maintaining top-tier scoring agreement.
- **Adversarial Testing:** Ran A/B comparative evaluations and developed complex edge-case scenarios to expose model weaknesses and failure patterns.
- **Rubric Feedback:** Applied and stress-tested evaluation rubrics, providing direct feedback to task designers where criteria were unclear, ambiguous, or under-specified.

SOFTWARE QA & TEST AUTOMATION ENGINEER | Elite Tech Solutions (Contract, Part-time) | January 2024 – Present

- **Automation Architecture:** Built end-to-end automated tests with Playwright, TypeScript, and JavaScript, authoring 40+ E2E tests with the Page Object Model (POM).
- **Efficiency Optimization:** Reduced release verification time by 50% by developing an optimized automated smoke-testing suite.
- **Defect Discovery:** Ran functional, regression, and cross-browser testing, validated API integrations, and documented 30+ reproducible defects.

AI RESPONSE REVIEWER / ANNOTATOR | RWS (Contract, Part-time) | September 2025 – October 2026

- **Safety & Compliance:** Executed precise harm and safety categorization, systematically flagging policy violations, user harm, group harm, and societal harm across varied content types.
- **Data Integrity:** Applied rigorous annotation and quality-control procedures to ensure the absolute reliability of AI training datasets.

PROJECT SUPERVISOR | BM Group | January 2024 – December 2024

- **Team Leadership:** Supervised team members, managed project timelines, and reinforced quality standards to support on-time delivery.

QA SPECIALIST | Apex Digital Systems (Contract) | January 2022 – December 2023

- **Manual QA Mastery:** Designed and executed 300+ manual test cases across Chrome, Safari, Firefox, Edge, iOS, and Android.
- **Defect Tracking:** Logged and tracked 50+ critical defects in Jira, working with developers to resolve them within Agile sprints.

AI EVALUATION SPECIALIST | TELUS International (Contract) | January 2021 – December 2023

- **High-Volume Execution:** Evaluated thousands of AI-generated responses for factual accuracy, logical reasoning, and instruction adherence, scoring full marks across all assessed harm and safety categories.
- **Failure Analysis:** Identified hallucinations, linguistic inconsistencies, and edge-case failures across ambiguous and adversarial scenarios.
- **Quality Assurance:** Authored evidence-based rationales cited by reviewers as among the strongest, resulting in a formal promotion to the Top Contributor Tier.

PROJECTS

EvalOps – AI Quality Engineering & Benchmarking Platform

Technologies: Next.js, TypeScript, PostgreSQL, Gemini API, Playwright

- Designed, developed, and deployed a full-stack AI evaluation platform; integrated the Google Gemini API to evaluate responses for factuality and reasoning quality.
- Built evaluation workflows to analyze model performance, with Playwright E2E tests and network mocking to validate workflows and error handling.
  Live Project: https://evalops-eight.vercel.app

Nexus – Team Collaboration SaaS

Technologies: Next.js, TypeScript, Prisma, Supabase, Tailwind CSS

- Developed a team collaboration app with collaborative workspace interfaces, responsive layouts, component architecture, and state management.
- Diagnosed and resolved responsive layout issues around the 768px breakpoint.
  Live Project: https://nexus-iota-two-17.vercel.app

TECHNICAL SKILLS

- **AI & LLM Evaluation:** LLM Evaluation, Response Rating, Factuality Assessment, Hallucination Detection, Reasoning Evaluation, AI Safety Review, Harm & Safety Categorization, Prompt Engineering, Adversarial Testing, Instruction Following, Multi-turn Evaluation, Model Benchmarking.
- **AI Code Evaluation:** AI-Generated Code Review, Code Quality Assessment, React Code Evaluation, TypeScript Code Analysis.
- **QA & Automation:** Playwright, End-to-End Testing, Regression Testing, Smoke Testing, Cross-Browser Testing, API Testing, Page Object Model, Jira.
- **Development:** JavaScript, TypeScript, React, Next.js, Node.js, Python, HTML5, CSS3, Tailwind CSS, PostgreSQL, Prisma, Git, GitHub, Vercel, REST APIs.

EDUCATION, CERTIFICATIONS & AWARDS

- **B.Sc. Computer Science** — Kwara State University (KWASU) | Expected 2027
- **Diploma in Civil Engineering** — CAILS, Kwara State | Completed 2022
- **Certifications:** Micro1 Frontend Engineering Certification (November 2026); Mercor Academy: Mastering Model Mechanics, AI with Human Expertise, Introduction to Agents
- **Award:** NACOSS Award of Excellence, Nigerian Association of Computer Science Students (KWASU Chapter), for leadership, academic excellence, and contribution to the computer science student community
- **Languages:** English (Professional/Fluent) | Yoruba (Native; fluent in reading, writing, and content evaluation)
